

BRISTLECONE PINE, considered one of the oldest living things known to man, was to be planted in May 1964 on the southern edge of Crown Park, Camas, by these members of the Camas-Washougal Men's Garden Club, Dr. David Goheen, Gus Lorenz, Dr. John Henderson, Earl Furniss and Ben Lancaster. The pine, plus two Oregon Myrtles and two magnolias came from the Salem Men's Garden Club. Lancaster exchanged several of his rhododendron hybrids for them.
